A meaningful step-up

Margin profile sees a quantum jump despite near-term revenue snag

- COFORGE reported a strong 4Q revenue growth of 2% QoQ in CC terms, above our estimate of 1.5% QoQ CC. The company reported an order intake of USD648m (down 69.5% YoY) in 4Q with five large deals, resulting in a robust 12-month executable order book of USD1.75b. EBIT margin stood at 16.6%, above our estimate of 15%. Adj. PAT stood at INR6.6b (up 119% YoY) vs. our estimates of INR4.8b. The FCF-to-NI ratio stood at 76.3% in FY26.
- FY26 revenue/EBIT/adj. PAT grew 35.9%/82.7%/73.8% YoY. In 1QFY27, we expect revenue/EBIT/adj. PAT growth of 23.5%/57.3%/56.3% YoY in INR terms. RoE came in at 16.5% in FY26 (vs. 13.9%/24.1%/23.1% in FY25/FY24/FY23). We value COFORGE at 26x FY28E EPS, arriving at a TP of INR1,800, implying 54% potential upside.

Our view: Striving to be on the right side of the AI-wave

- **Revenue restated, hedged loss/gain now part of other income** (previously a part of operational revenue): This has no impact on PAT but revenue and EBIT margin numbers are now restated and they do not include the impact of hedge losses. **For context, hedge losses had an 80bp impact on EBIT margin in FY26 (nil in FY25).**
- **Exiting the India pass-through business improves working capital as well as margin profile:** Coforge's India government business was pass-through in nature, and it has decided to exit this business. On a full-year basis, this would have a **hit of 2-3%**; majority of the impact will flow through in **1QFY27** (which is expected to be flat QoQ). While this blunts short-term growth rates, the deal book remains strong (executable order book at USD1.75b, +16.4% YoY, with additional framework agreements not included) and we expect Coforge to grow after the reset in 1Q.
- **EBIT margin guidance receives a meaningful upgrade:** Even assuming a similar impact of hedge losses in FY27, the updated margin guidance is at least 100-150bp above our earlier estimates. **This is a meaningful uplift; we increase our EPS estimates by 3-4%** despite the one-time impact from the India business hit.
- **Executable order book provides visibility into FY27:** Deal momentum remained healthy in 4Q, with order intake of USD648m and five large deal wins, taking **total large deal wins for FY26 to 21 (vs. 14 in FY25), ahead of management guidance of 20 deals.** The executable order book stands at USD1.75b (up 16.4% YoY), providing revenue visibility into FY27.
- **Coforge finding pockets of growth in AI:** Demand is shifting from experimentation to production-grade deployments with a focus on agent orchestration, enterprise workflows and managed services around AI systems. **We are positively surprised at the book's resilience to AI deflation, with management highlighting 25-35% productivity gains in development and 40-60% in code generation, yet sustained demand for maintenance, security and integration services.**

- **BFS uncharacteristically weak, management expects turnaround:** Coforge's BFSI vertical has remained weak for the past couple of quarters (decline of 2.0%/2.6% QoQ in 3Q/4Q). **A key leadership exit in the vertical has coincided with this; management expects the vertical to be back on track in FY27,** supported by deal pipeline and re-engagement in key accounts (2 of 5 large deals in 4Q from banking).

Valuation and changes to our estimates

- We expect COFORGE to be the growth leader within our coverage universe and we reiterate it as our top pick. We have increased our estimates by 3-4% to factor in the exit of the India pass-through business (2-3% revenue impact) and the restatement of revenue (hedge impact now excluded from EBIT), while building in a 100-150bp improvement in margin guidance.
- We continue to view COFORGE as a structurally strong mid-tier player, supported by improving margin profile, strong deal wins, and steady demand in AI-led managed services. **We value COFORGE at 26x FY28E EPS with a TP of INR1,800,** implying a 54% potential upside. We reiterate our BUY rating on the stock.

Beat on revenue and margins; Deal TCV healthy with five large deal wins in 4Q; FCF/NI at 110%

- COFORGE's revenue grew 2% QoQ CC (est. 1.5% CC). Reported USD growth was 1.7% QoQ. For FY26, revenue stood at USD1.9b, up 29.2% YoY.
- Growth was led by the Healthcare and Hi-Tech vertical (12% QoQ) and Transportation (4.5% QoQ), while BFS declined 2% QoQ.
- Order intake was USD648m (down 69.5% YoY). Five large deals were signed in 4Q. The 12-month executable order book rose 16.4% YoY to USD1.75b.
- Management expects to deliver robust revenue growth in FY27 and EBITDA of more than 20.5% on a consolidated basis in FY27.
- EBIT margin was 16.6%, above our estimates of 15%. For FY26, adj. EBIT margin stood at 14.4% vs. 10.5% in FY25.
- Utilization grew 80bp QoQ to 82.5%. Net employee addition stood at 35,777, up 1.2% QoQ. Attrition was down 10bp QoQ at 10.8%.
- Adj. PAT stood at INR6.6b (up 119% YoY) vs. our estimates of INR4.8b. For the full year, adj. PAT stood at INR17.9b, up 83% YoY.
- FCF/PAT stood at 110% in 4QFY26.

Key highlights from the management commentary

- Despite a challenging macro and heightened AI-driven flux, management maintains that demand tailwinds for Coforge are structural – the near-term modernization surge, the medium-term agentic deployment wave, and long-term tech market expansion all play to its strengths.
- Management addressed concerns around AI code deflation, noting that AI-generated code is cheap to build but expensive to own, maintain, and secure, creating a recurring high-margin managed services opportunity for firms positioned to capture it.

- Demand remains broad-based, with all key verticals – travel, healthcare, banking, insurance, and public sector – firing simultaneously; management expressed confidence that growth does not depend on any single vertical.
- Framework agreements (not captured in the executable order book) have already been signed and are expected to contribute materially to FY27 revenue; management indicated that additional, larger framework agreements are at near-final stages of closure.
- Cross-selling momentum from prior acquisitions is evident. Clients acquired through the Cigniti deal, who previously contributed USD25-30m collectively, have now scaled up to ~USD75m/year.
- AI is deeply embedded across the SDLC: the firm reports 25-35% productivity uplift in development, 40-60% in code generation, and up to 10x faster modernization timelines.

Key highlights from the management commentary

Demand outlook

- Despite a challenging macro and heightened AI-driven flux, management maintains that demand tailwinds for Coforge are structural – the near-term modernization surge, the medium-term agentic deployment wave, and long-term tech market expansion all play to its strengths.
- Management addressed concerns around AI code deflation, noting that AI-generated code is cheap to build but expensive to own, maintain, and secure, creating a recurring high-margin managed services opportunity for firms positioned to capture it.
- Demand remains broad-based, with all key verticals – travel, healthcare, banking, insurance, and public sector – firing simultaneously; management expressed confidence that growth does not depend on any single vertical.
- Framework agreements (not captured in the executable order book) have already been signed and are expected to contribute materially to FY27 revenue; management indicated that additional, larger framework agreements are near the final stages of closure.
- Cross-selling momentum from prior acquisitions is evident. Clients acquired through the Cigniti deal, who previously contributed USD25-30m collectively, have now scaled up to ~USD75m/year.
- AI is deeply embedded across the SDLC: the firm reports 25-35% productivity uplift in development, 40-60% in code generation, and up to 10x faster modernization timelines.
- 1QFY27 revenue is expected to be broadly flat QoQ on a reported basis, as the deliberate exit of a ~USD15-20m/quarter low-margin India portfolio will offset underlying growth momentum; a strong acceleration from 2Q onwards is anticipated.
- The UK public sector framework operates differently from standard deal structures – a 150m+ sole-award deal signed in 4Q carries a base run rate of ~USD4-5m/quarter, with multiple additional deals in the tens-to-hundreds of millions under active pursuit.
- Top 5 accounts grew 45.8% YoY and accounts ranked 6-10 grew 30%; collectively, the top 10 contributed ~30.8% of revenue and grew ~40.4%.
- The firm now has one client generating >USD100m in annual revenue, three in the USD50-100m band, and nine in the USD20-50m range, indicating a maturing and deepening account portfolio.
- **BFS:** BFS grew ~12% in USD terms in FY26, below the company average, primarily due to a single large client that underperformed – now transferred to direct leadership stewardship with a fully refactored engagement model and a new team.
- **Insurance:** Insurance maintained steady growth through FY26; management expects growth to accelerate in FY27.
- **Travel, Transportation & Hospitality (TTH):** Travel grew ~62% in USD terms in FY26, driven by secular tailwinds around digitization, airport reconstruction, and the "one order, one offer" paradigm. Near-term travel demand remains healthy; Spirit Airlines revenue exposure is negligible (~10bp of FY27 budget) – any impact is immaterial to overall growth. Cross-selling from the Sabre partnership is already yielding results – a ~USD20m airline relationship, previously a non-material Coforge client, has been established post-Sabre.

- **Healthcare & Hi-Tech:** The segment grew ~98% in USD terms in FY26, nearly doubling in size and becoming a meaningful ~10% of total revenue. Management expects the vertical to continue growing at an accelerated pace in FY27, with the combined Coforge-Encora entity in this space expected to reach ~USD170-175m.
- **Government (overseas):** Government business outside India grew ~17.5% in FY26 in USD terms; the USD150m+ UK public sector sole award signed in 4Q provides strong baseline visibility. Additional UK public sector deals – several in the USD10-100m range – are described as "locked and loaded" by management; no intention of pursuing US public sector.
- ESOP costs are expected to stabilize at ~0.8-0.9% of revenue; no new incremental pool is planned, and the Encora-related retention needs will not dilute the margin guidance.
- Management articulated six competitive moats in AI: deep domain expertise, client intimacy, reinvented delivery models (Mod Squads), agility at scale, a scalable proprietary AI platform (OneAI), and an AI-enabled workforce.
- Coforge has >30,000 AI-enabled workforce members, 11,000+ data and AI practitioners, and 600+ advanced AI practitioners - built through significant upskilling investments.
- Case study: COBOL-to-Java 21 modernization for a Tier 1 bank completed in half the client-allocated time using specialized decomposition agents and a 3-person forward deployed team.
- Over 25 AI recognitions received from leading analyst firms, including seven "Leader" positions from Everest, HFS, Constellation Research, ISG, and Amazon.
- Accounting change (effective FY26): Hedge gains/losses are now reported under other income (not revenue); this isolates EBIT margins from FX volatility and aligns reporting with peers. All comparatives have been restated. PAT is unchanged.
- DTL reversal of ~INR 1.8b (non-cash, one-time) was recorded in 4Q following the effective implementation of the Cigniti amalgamation scheme - reported 4Q ETR stands at -7% (normalized: 22%); FY26 reported ETR at 13% (normalized: 23%). Steady-state ETR guidance for FY27 is 23–24%.
- FCF improved sharply – 4Q FCF stood at USD73.7m (highest-ever quarterly FCF); FY26 FCF was USD135m, up ~68% YoY. FCF-to-PAT guidance has been upgraded to 100%+ for FY27 (vs. prior guidance of 70–80%), driven by improved collections rigor, payables management, and contract structuring.
- Minority interest will reduce materially from 1QFY27 (from ~540m /quarter to ~90m/quarter) following the effective consummation of the Cigniti merger; record date for share allotment is May 16 – this will provide an EPS upside from 1QFY27 onward.
- India low-margin portfolio exit (~USD40-45m annual revenue, ~USD15-20m/quarter run rate) has been deliberately executed to permanently reset margins; management expressed high confidence in the revenue pipeline to absorb this impact.
- Hedge book mark-to-market loss is estimated at ~INR1.4-1.5b at current spot; expected to taper from 3QFY27 onward. The company has shifted towards natural hedges via a USD550m USD-denominated term loan, reducing reliance on cash flow hedges.

Margin performance and other comments

- 4Q EBIT margin expanded sharply to 16.6%, up ~531bp QoQ and ~430bp YoY, marking a structural reset rather than a one-off improvement.
- Key tailwinds to 4Q margin: revenue operating leverage (+100 bps), favorable FX movement (+80bp), third-party cost reduction (+50bp), lower marketing spend (+40bp), and lower ESOP costs (+20bp); partially offset by provisioning on doubtful debt (-60bp).
- FY26 EBITDA margin expanded to 18.6% (vs. 14.3% in FY25), with EBITDA growing ~77% YoY to INR2,464m.
- 4Q EBITDA exit rate stood at 20.5%, forming the base for FY27 guidance.
- For FY27, management guided: EBITDA margins of 20.5-21.0% (consolidated), EBIT margins of 16.5-17.0% (standalone, ex-Encora) and ~15.5% on a consolidated basis – the ~150bp gap being entirely attributable to ~USD40m/year of Encora-related amortization.
- Management indicated that FY27 guidance represents the floor - incremental improvement is expected into FY28 and beyond as synergies from Encora and continued AI-led cost optimization compound.
- Margin reset is driven by three structural factors: (1) AI adoption at scale capping G&A in absolute terms, (2) G&A synergies of 20-25% from the Encora acquisition, and (3) planned exit of ~USD40-45m of low-margin India business.

Valuation and view

- We expect COFORGE to be the growth leader within our coverage universe and we reiterate it as our top pick. We have increased our estimates by 3-4% to factor in the exit of the India pass-through business (2-3% revenue impact) and the restatement of revenue (hedge impact now excluded from EBIT), while building in a 100-150bp improvement in margin guidance.
- We continue to view COFORGE as a structurally strong mid-tier player, supported by improving margin profile, strong deal wins, and steady demand in AI-led managed services. **We value COFORGE at 26x FY28E EPS with a TP of INR1,800**, implying a 54% potential upside. We reiterate our BUY rating on the stock.
