Indian Equity Market Performance:

Indian equity markets nosedived on Monday and logged their worst monthly loss in six years as rising energy risks amid escalating U.S.-Iran tensions rattled investors.

Sectoral Front Performance:

On the sectoral front, all the sectors ended in the red with auto, FMCG, consumer durables, capital goods, telecom, realty, private bank, PSU bank down 2-4%.

Technical Analysis:

Nifty 50 extended its decline on the daily charts, forming a long red candle with an upper shadow after a gap-down opening, signalling firm bearish dominance. The lower top-lower bottom pattern remains intact, with the index trading below all key moving averages, which continue to slope downward. Momentum indicators further underline the weakness, as the RSI slipped to 32 with a fresh negative crossover, while the MACD stayed well below both the signal and zero lines. Despite the prevailing bearish bias, oversold conditions and signs of exhaustion among sellers may trigger a near-term rebound towards the 22,500–22,700 zone. However, sustaining gains will be crucial. A decisive breach of the rising support trendline could intensify selling pressure, dragging the index towards the 22,000–21,700 levels.

Option Activity:

On the option front, maximum Put OI is at 22500 followed by 22800 strike, while maximum Call OI is at 23000 followed by 23500 strike. Call writing was seen at 23000 strike, followed by 23200 strike while Put writing was seen at 22800 strike, followed by 22850
